

High Uric Acid Foods to avoid to Stop Gout Attacks Ruining Your Life

Want to know the high **uric acid** foods to prevent if you have gout, and want to prevent future attacks? Here, you'll discover a list of food to avoid, plus, a list of reduced **uric acid** foods you are able to eat as a **gout sufferer**.

WHAT are the Causes of HIGH URIC ACID?

Order to understand this, you need to be familiar with natural chemical compounds that all of us have in our bodies, and, that also is out there in our foods. These substances are called "purines". They are essential in the process to provide us with our protein and energy.

During this process, however, **purines** actually break down, and one of the byproducts of this response is uric acid in your bloodstream. Your kidneys then method and expel excess uric acid from your digestive system by way of your bladder and urine.

Unfortunately, when either there is too much uric acid being produced, or, your kidneys cannot method it fast or efficiently adequate, excess acid is maintained in your blood stream and circulated around your body. This excess acid can then be deposited in crystalline form in your joints (your big toes the majority of the time, but other joints since well).

Under the microscope these crystals are usually in the form of tiny needles which give rise to the symptoms of gout; inflammation, inflammation, inflammation and, obviously, amazing pain.

But WHY SHOULD Some FOODS be Ignored I.E. High URIC ACID FOODS?

Remember above how uric acid is produced by purines, and, purines also exist in our food? Well, a lot of purines can lead to too much acid for your kidneys to handle and you end up with excess acid in your blood, leading to crystals in your joints and thus a **gout attack!**

So it's just common sense that a person suffering a gout attack, or, someone who has regular gout attacks, should avoid foods that are high in purines.

- And it becomes even more important when you learn that once having one gout attack, you might be almost certain to have others.
- And also repeated, frequent gout attacks can lead to permanently damaged joint parts and kidney stones.
