

Various Types of Arthritis

Contrary to what others believe, Arthritis doesn't only have an effect on men and women of the age bracket of 40 and above. In fact, research shows in which early signs of Arthritis, such as joint pain, shows to be able to person as young as 16. You may think that Arthritis is a simple situation of the joints where swelling occurs, what others do not realize is that Arthritis could be a sign of a more serious and complicated health conditions.

There are plenty of diseases which involves with arthritis such as osteoarthritis, rheumatoid arthritis, **gout** and lupus. These diseases have one thing in common, the symptoms including joint pain, swelling in the joint, stiffness specially in the morning, warmth, and redness of the skin around the joint, fever swings, too much fatigue and bumps and lumps. These symptoms frequently vary with regards to the kind of arthritis you've got.

“ Osteoarthritis the most frequent type of arthritis between aged men is caused by a wear and tear of the joint. It comes with old age as they say or may come as a result of an injury. It is not curable and could be managed with a healthy way of living and prevention through physical rehabilitation and exercise. Gout, another type of arthritis, is caused by the deposition of **uric acid** crystals around the joint that makes it very painful to move specifically in the event that inflammation was at its worst. Some other patients with **Gouts** usually lose purpose to the joint affected.
